Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 12 March 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 15-20 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 15-20 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group II in Paper No. 4 is acknowledged.

The cancellation of claims 1-14 is also acknowledged.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 15- 17 are rejected under 35 U.S.C. 102(e) as being anticipated by Kwon et al. (US 2002/0017711, herein after Kwon.)

In regard to claim 15, in figs 6-7, Kwon discloses a process for fabricating a bump comprising:

performing an activation step by opening the passivation layer 106 to expose the chip pad 104. The pad 104 is coated by a medium layer, Zinc, see sections [0022] and [0023]; and

forming a bump body 108 on the medium layer in an electricless plating way; see section [0023].

In regard to claim 16, Kwon further discloses that the bump is made of Nickel; see section [0023].

In regard to claim 17, see the above discussions regarding to claim 15.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 18-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kwon as applied to claims 15-17 above, and further in view of Hwan et al. (US 2002/0180064, herein after Hwan.)

In regard to claim 18, Kwon discloses all of the claimed limitations as mentioned above except a step of forming a photo resist layer on the chip, wherein the photo resist has at least an opening that exposes the bonding pad and the step of removing the photo resist.

Hwan, in fig. 1C, discloses an analogous device including bon pad and further discloses a step of forming a photo resist layer 34 on the chip 12, wherein the photo resist has at least an opening that exposes the bonding pad 26 and the step of removing the photo resist in order to form a column bump pad that has mushroom structure; see section [0007]. It is also a well-known method to make UBM bump.

Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention was made to use the photo resist as taught by Hwan in Kwon's in order to obtain the advantage mentioned above.

In regard to claims 19-20, Hwan further discloses a bump body passivation 208 that made of Gold, in fig. 2D, in order to protect the metal layer below, metal 207; see section [0029].

Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention was made to use the photo resist as taught by Hwan in Kwon's in order to obtain the advantage mentioned above.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
